DETAILED ACTION

Election/Restrictions

1. Claim 19 is generic to a plurality of disclosed patentably distinct species comprising:
 - a. A system for delivering aerosol -- see Figures 1 and 3
 - b. A light scatter detector -- see Figures 2 and 2A; and,
 - c. A method of measuring the physical characteristics of an aerosol - see Figures 4 and 5.
2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Remarks on Specification

4. The disclosure is objected to because of the following informalities: Cross-References to related applications (See 37 CFR 1.78 and MPEP § 201.11) listed in the first paragraph on page 1

Art Unit: 2877

does not have the corresponding U.S. Patent application number(s). Appropriate correction is required.
